

Application No. 09/314,058  
Amendment dated December 10, 2003  
Reply to Office Action of October 1, 2003

### CLAIM AMENDMENTS

1-30. (Canceled)

31. (Currently Amended) A The method of ~~claim 30~~, further comprising:

providing a computer having a first display, a second display, and a base unit  
containing a keyboard, the unit separate from the first and second displays;

providing the first display to face in a first direction;

providing a second display to face in substantially the first direction;

configuring the first display to receive a pen-based input;

configuring the keyboard to receive an input;

hingedly connecting one of the first display and the second display to the base

unit;

hingedly connecting the first display to the second display;

folding the first display onto the second display, wherein the first display and the  
second display remain exposed;

folding the first and second displays onto the base unit to form a tablet  
arrangement, wherein the first display remains exposed; and

configuring the first display to receive a pen-based input in the tablet  
arrangement.

32. (Currently Amended) The method of claim 31 28, further comprising:

configuring the second display to display an image concurrently with receiving  
the pen-based input at the first display.

33. (Previously Presented) The method of claim 32, wherein providing the first display comprises providing a conventional computer output display and providing the second display comprises providing a pen-based input display.

34-35 (Canceled)

36. (Currently Amended) The computer system of claim 38 35, wherein the unit comprises a base unit of a laptop computer.

37. (Canceled)

38. (Currently Amended) A The computer system of claim 37, wherein comprising:  
a separate unit containing a keyboard;  
a first display adapted to display a raster image, the first display facing in a first  
direction;  
a second display adapted to receive a pen-based input, the second display  
hingedly connected to the first display and facing substantially in the first direction; and  
a hinge to connect the unit is hingedly connected to the first display,  
wherein the first display and second display are foldable onto the keyboard to  
provide a pen-based tablet arrangement in which the second display remains exposed and is  
adapted to receive the pen-based input.

39. (Canceled)

40. (Currently Amended) The computer system of claim 38 39, wherein the unit is adapted to receive input from the keyboard.

41. (Currently Amended) The computer system of claim 38 37, wherein the second display is foldable onto the first display such that said first and second displays remain exposed.
